

O/CLOUD

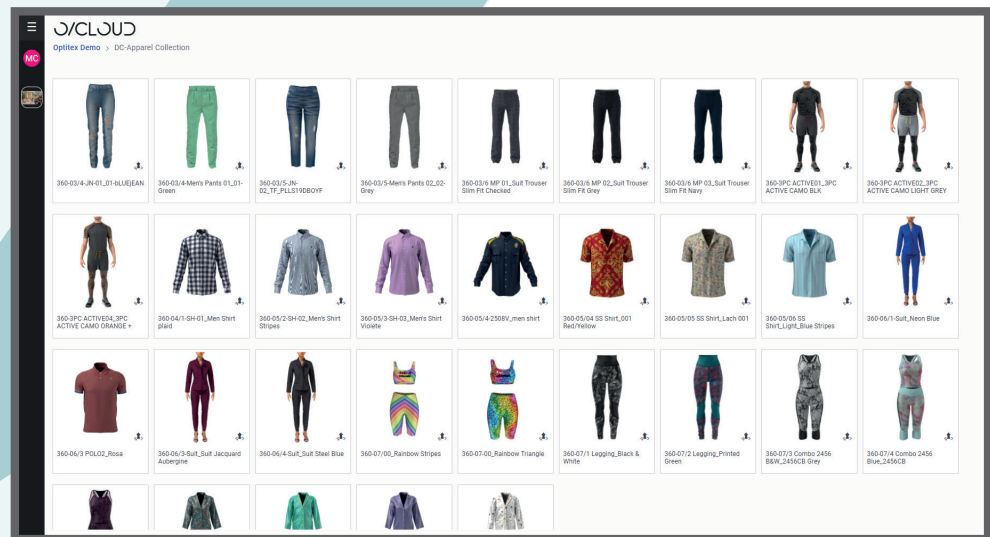

3D Collaboration – From Concept to Production

Shared management platform for all your
product development assets – 3D models,
related tech data, and more

OPTITEX

O/CLOUD

A cloud-based platform, O/Cloud is a collaborative hub that offers users a variety of tools, features, and functionality to efficiently manage digital patterns and virtual samples. The platform enables seamless collaboration between team members and external stakeholders, regardless of location, making working together easier on digital products and collections.

Bringing Global Teams Together for Seamless Communication and Decision-Making

Streamlined Collaboration for Digital Product Development Excellence

- Add your colleagues, partners and vendors to your O/Cloud workspace for fast and easy collaboration
- Grant, customize, and manage user permissions to ensure secure and efficient collaboration across all projects
- Share your product-related data (design, development, production files)
- View 3D files, 360°/animations or single images and other documents, all on a single shared platform
- Use Side-by-Side mode to review up to 6 3D styles – Gain comprehensive control over design reviews, from comparing different design versions and colorways, to evaluating fabric choices and ensuring optimal fit. Customize views by enabling features to suit your requirements

- Share Fit data with your team using 3D Fit Tools, such as analysis of Stretch, Distance and Wireframe maps
- Seamlessly comment on any file in your workspace, and tag colleagues, partners and suppliers, to deliver the latest updates directly to their inbox
- Add Pin and Markup tools to the digital garment to provide comments in specific areas on the garment, saved and displayed when selected
- Manage revisions to evaluate changes during the development cycle
- Create presentation boards to prepare your collection for review or to present a new project

Efficient Workflows for a Sustainable Future

- Ensure everyone uses the most up-to-date information with automatic syncing and version control, minimizing errors and miscommunications
- Support sustainability efforts by reducing the need for physical samples, and minimizing waste via efficient digital workflows
- Accelerate your product development cycle by reducing the time spent on revisions and approvals, enabling faster market entry, and response to trends

Why Optitex?

Because Efficiency & Precision Matter

30+ Years of Experience

Global Presence

Support for Multiple Languages

Comprehensive Product Suite

Robust Customer Support

Sustainability Focus
